

DIY-Kitchen Kits for Homeowners – Easy to Install

We create your Linear light Bars to the dimensions you provide us, and we help you wire your kitchen with our wiring instructions sent with your quote, so your DIY projects starts off right.

DIY Kits

For existing cabinets, each kit comes with everything you need to light your kitchen; power supply, switching with dimming functions, and your sized LED bars. You will need basic tools like a measuring tape, drill, wire cutters etc. Attach your light bars to your cabinets connect your system to power its that easy.

Do-It-Yourself Kits

Measuring

Measure the inside dimensions of the cabinet, side mount or bottom mount the measurement must be the total length you want the bar not to exceed, that is the size bar you will request. We will create a LED bar that fits that cabinet size.
